STUDENT TESTING PROGRAM

Standardized tests are an important part of a balanced evaluation program in which a variety of instruments and procedures are used to assess student attainment of goals.

Standardized tests of achievement shall be administered to district students on a regular basis. The purpose of the testing is to provide information which can be used in program evaluation, screening students for placement in special classes, and making decisions leading to the improvement of instruction.

The superintendent or designee shall choose the tests, determine the time they will be administered, and specify the nature and use of reports of the results.
