Message from Mr. Meigs

Dear Families,

It has been a remarkable week at Lowrie Primary! The Science Fair was an incredible success. We had close to 200 projects in our fair! That is truly amazing. Thank you for your support of students and their scientific thinking. Each year we have more and more projects. To see the faces of children filled with curiosity and inquiry as they explored the different projects was amazing. I cannot wait until next year!

As you know, Student-Led Conferences are right around the corner. **Please make sure you are available the week of March 16th!** It is important to note that teachers will provide the opportunity for afternoon or evening conferences (March 16, 17, 18) and a full day on March 19. Each teacher will have their conference schedule ready for families to sign up by tomorrow afternoon.

Student-led conferences are such an important link between school and home! We hope you will arrange your schedules so your children are both at school during conference week and are available for your conference time. It means a great deal to us when you are able to attend this important school function with your child.

It can be challenging to reschedule a conference after spring break, but teachers will make efforts to reschedule a conference missed due to special circumstances as they are able. Again, please make every effort to attend student led conferences the week of March 16th - these conferences are a wonderful showcase of student learning and an opportunity to discuss your child's progress with both your child and his or her teacher.

Lowrie is a remarkable learning community because of the care and belief in children that each staff member, parent and child has in all that is possible! Thank you for being a part of our school.

With appreciation,
Patrick

CHILD CARE
AVAILABLE

Presentation by Linda Eby, MA, certified Love & Logic Presenter, school counselor of 26 years, presenter at state and national conferences, as well as to educators worldwide. Past president of the Oregon School Counselor Association, and previous Oregon Counselor of the Year.

- Learn simple and practical techniques you can try right away at home.
- Teach kids to be accountable for their own behavior
- Find out how to end arguments quickly and without tantrums
- Have more fun with your kids!

Please RSVP to Ms. Emily, school counselor at (503) 673-7704, or sign up in the office

Notes From Our Office

Thank you to our PTA for their generous donation of funds raised at the Wheel-a-thon! With this donation we have been able to purchase an incredible number of new texts to support reading. We have purchased books for our leveled literacy collection. These books allow teachers to support reading instruction in their classrooms by having a range of books on a variety of topics at the appropriate level for all readers in their classrooms. Our growing collection of level books is such a valuable resource for teachers and students. Thank you so much to the PTA and our entire community for helping make this purchase possible!

It is important that all children are here at school by 7:50 every day. Each day starts with a morning meeting where classroom community is built, expectations are reviewed and discussed and the learning for the day is set-up. These are incredibly important learning times and it is difficult for children to jump into the classroom having missed this time with their classmates. Every minute of a school day is valuable and we want to be sure that children are here, present and engaged every day from 7:50 to the end of the day. Thank you so much for your help in ensuring your child is here on time and ready to learn each and every day.

Community Notes

It's time for another season of CREST Learning On The Go... and you're invited!

Critters and Creepy Crawlies

Thursday, March 19, 2015

For students in grades 1, 2, 3, & 4

Join us for a fun-filled day of exploration. We'll explore the pond, gardens, fields and forests near CREST for living creatures.

Super Space Day

Friday, March 20, 2015

For students in grades 3, 4, & 5

Come learn about our solar system and the universe! Practice engineering activities with simple robots and design a landing craft that will withstand a lunar touchdown. Learn about the relative size and distance between planets and crawl into a portable planetarium.

To learn more about these trips or to register, please visit the CREST website at:
