

WLWV Panorama Results - G. 3-5 Students Responses, Spring 2024

This survey is conducted with students in Grades 3-5. Students self-select their responses based on their experiences. This is confidential information to each student.

How to understand the % listed below: There are seven (7) categories of social-emotional indicators. Within each category are 6-8 questions. Panorama uses a 5-point Likert scale for responses for each question. In this table, only the top two responses were counted in the favorable % response for each question. For example, if the choices are: Not at all; A Little; Somewhat; Quite a Bit; Completely Possible, only the top two choices are considered in the favorable % response for that question. Each question has 5 different qualifying response choices. Counting only the top two responses, removes the “middle” response which is often selected when respondents are indifferent, unsure of how to respond, or feel “fine” with the status quo. Staff are able to disaggregate students' responses on all five response choices by various groups (e.g. gender, race, ethnicity). **The overall questions’ top two results within each category are added and averaged, which is what is documented below.**

School	Growth Mindset Student perceptions of whether they have the potential to change those factors that are central to their performance in school.	Social Awareness How well students consider the perspectives of others and empathize with them.	Self Efficacy How much students believe they can succeed in achieving academic outcomes.	Emotional Regulation How well students regulate their emotions.	Teacher-Student Relationships How strong the social connection is between teachers and students within and beyond the classroom.	School Climate Perceptions of the overall social and learning climate of the school.	Sense of Belonging How much students feel that they are valued members of the school community.
