	• District will be doing a full audit of the FOB shelter lock batteries to		

• Shelter lock has been discontinued. The district bid Key Scan to	
replace lock sets at WLHS. Due to the bid the district received we	
are putting the project on hold. Likely that WLHS will not be	
updated this summer. District working on a resolution for this.	
• Trillium Creek primary will be updated with the shelter lock system.	
7.19.2023	
 Trillium Creek is moving along with their security upgrades. 	
Including curtains, new entry and lock system.	
Drills	
1.18.2023	
• IT has implemented a new pre-drill announcement that will go out	
on the PA system before every drill (fire, shelter, lockdown) so that	
everyone knows a drill is occurring.	
• Also have rolled out a 'softer' all clear announcement at each school.	
 Would be great to have some protocols in place for building 	
engineers to understand their roles in drills. Often when there is a	
sub for an engineer they are unsure what to do. Having an outlined	
protocol sheet would be beneficial. 2.15.2023	
• All schools using the new pre-drill announcements. Drills are going	
well.	
• Some staff members are concerned that if we always notify students	
before the drills then in a real emergency they won't really know	
what to do. This should be a building decision if they want to not	
notify before their drills.	
3.15.2023	
Drills have been going well. Caitlin Sullivan	
• The District postponed the First Responders in March due to weather Jeremy Nichols Of	ngoing
- working on rescheduling a date for the meeting. <i>Jeff Chambers</i>	
4.19.2023	
• Drills are going well. It is nice to be able to test our systems while	
doing drills, it helps school staff & operations staff to ensure our	
systems are working properly.	
• District is hosting our last First Responders meeting of the year	
today.	
• Staff that work in the Annex at Stafford would like better	
communication for the shelter lock system and to be notified when	
an event occurs. Operations staff looking into ways to help achieve	
this.	
5.17.2023	
• Drills have been going well. We have one more lockdown drill to	
complete and then our June fire drills.	
6.21.2023	
• All drills have been complete for the year! All schools met the	
requirements regarding drills for the year.	
7.19.2023	
No drills during the summer.	
True North	
1.18.2023	
• True North is in the process of doing school site interviews with	
principal's/front office staff.	
• Once True North has completed all of their assessments they will	
provide the District with recommendations. Heneful that the	
recommendations provide some consistency across school sites.	ngoing
2.15.2023	
True North has completed all of their site visits and interviews and is	
• True North has completed all of their site visits and interviews and is now working on their report that they will provide the district	
now working on their report that they will provide the district.	

•	True North is still on schedule to produce the final report at the end		
	of March. Once they have produced the report they will come		
4 10 20	discuss their findings with district administration.		
4.19.20			
•	True North still on track to provide the district with their report by		
	the end of the month. True North will be participating in our First		
	Responders Meeting this morning to get more information on the		
5 17 20	topics the district discusses during these meetings.		
5.17.20			
• 6.21.20	Still waiting on the report from True North.		
•	Received the final report from True North. These will not be		
	published as they are classified documents. District Safety		
	Leadership Team is reviewing all of the reports and forecasting what items should be put on the part Rond recording safety related items		
7.19.20	items should be put on the next Bond regarding safety related items.		
1.19.20			
•	DSLT met to review the True North findings and will be meeting		
Enviro	again in August to discuss other items. nmental Testing		
1.18.20			
1.10.20	Radon testing at Wood and Lowrie in February. Water testing to		
	occur after the radon testing, 7 schools to have water testing.		
•	Maintenance is also putting fence guard at numerous locations – just		
•	finished at Cedaroak and are currently working at Boeckman Creek.		
2.15.20			
2.13.20 •	In the process of radon testing. Tested Lowrie last week and testing		
-	Wood this week. Lowrie still has high readings for radon, district		
	will continue to look at ways to mitigate.		
3.15.20			
•	Tested Wood for radon and all results came back under threshold in		
	all spaces.		
•	Radon testing at Lowrie came back high in one classroom. The		
	history of readings and the levels of which the HVAC was running		
	are contributors into the testing results. The District has numerous		
	organizations working to remedy this situation.		
4.19.20			
•	Testing the C-porch at Lowrie at different intervals and seeing how		
	the results correlate to the HVAC settings and different time		
	intervals. Continuing to have meetings regarding the radon results	x	o ·
	and the solutions the district can provide to mediate or minimalize	Jeremy Nichols	Ongoing
	the radon levels.		
•	During the summer the district will be making adjustments to the		
	control side as well as fan speeds to achieve the right balance to keep		
	the radon levels low but also still providing heat to the building.		
5.17.20			
•	Continuing the use of the continuous radon monitors at Lourie.		
	Currently testing in the C porch and all results lately have been		
	below the threshold. Will continue to test and will also test during		
	the summer.		
•	Testing lead in water at 6 locations. Have tested at Willamette,		
	Trillium, Bolton, Cedaroak, Stafford and Boeckman. We have		
	received some results back of tests being over the threshold. When		
	we receive those, we remove and replace the fixture that tested		
	above the threshold, after replacing we retest.		
6.21.20			
•	Have tested 6 schools for lead and water in regards to the HASS		
	plan. 5 of the 6 schools are 100% clear and one school remaining,		
	Stafford, one fixture had to replaced and retested.		
•	Lowrie radon temporary mitigation efforts during the Spring were		
	effective. Working through the summer with partners to achieve a		

more permanent solution. Will be using continuous radon monitors throughout the summer to see what adjustments occur. 7.19.2023	
 Continuing with radon monitoring at Lowrie PS. Maintenance team will be meeting on 7/27 to discuss how things are going for the summer testing. Have completed all testing at six schools for lead/water testing and all schools have passed their testing. 	

NEW SAFETY COMMITTEE ISSUES/DISCUSSION:

 West Linn PD to conduct an active shooter training at West Linn High School, July 27th – July 28th.

NEXT MEETING: September 20, 2023 – via Zoom at 7:00AM

Minutes were prepared by Caitlin Sullivan (<u>sullivac@wlwv.k12.or.us</u>). Please submit in writing any corrections to West Linn-Wilsonville District Safety Committee prior to the next meeting date; otherwise the minutes will stand as reported.
