

## WEST LINN - WILSONVILLE SCHOOL DISTRICT

### Water Quality Information

September 30, 2016

Dear Cedaroak Park Families,

This letter is being sent to update you about the water quality testing results that were shared last week. The initial results from July testing at Cedaroak Park Primary School showed that out of 57 test locations, three indicated elevated levels of lead that exceeded the action level of 20 parts per billion. This included an activity area sink, one classroom sink, and one restroom sink.

Immediate remediation steps were taken include turning water off at these locations, replacing subject fixtures, and retesting. After remediation, water was retested on September 23. The three fixtures tested below the action level of 20 parts per billion. These results have cleared all fixtures at Cedaroak Park Primary School for elevated levels of lead or copper.

More information about District water quality testing is available at <http://www.wlww.k12.or.us/Page/10603> .
