What is an HSA?

It is a great way to pay for medical expenses. An HSA is an individually-owned, tax-advantaged account that is used to pay for routine medical expenses either now or in the future. In order to set up an HSA, an individual must participate in an Internal Revenue Service (IRS) qualified High Deductible Health Plan (HDHP).

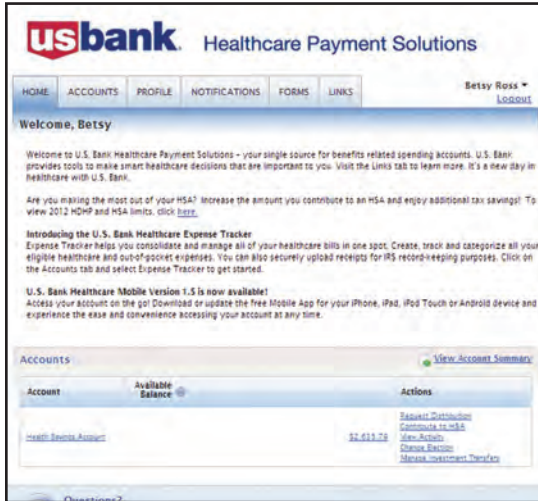

What are the benefits of an HSA?

- Your contributions are pre-tax or tax-deductible*
- Interest earned is tax-free
- Tax-free withdrawals may be made for qualified medical expenses
- Unused funds and interest are carried over, without limit, from year to year
- You own the HSA and it is yours to keep - even when you change jobs, health plans, or retire

*Contributions are tax-deductible on your Federal tax return. Some states do not recognize HSA contributions as a deduction. Your own HSA contributions are either tax-deductible or pre-tax (if made by payroll deduction). See IRS Publication 969. Consult a qualified tax adviser for advice.
