

## West Linn-Wilsonville School District 3JT

### ADMINISTRATION BUILDING

P.O. Box 35 · West Linn, Oregon 97068 · (503) 673-7000 or Fax (503) 673-7001

October 7, 2002

Dear Parents, Teachers, Building Occupants, and Employee Organizations:

In the past, asbestos was used extensively in building materials because of its insulating, sound absorbing, and fire retarding capabilities. Virtually any building constructed before the late 1970s contained some asbestos. Intact and undisturbed asbestos materials generally do not pose a health risk. Asbestos materials, however, can become hazardous when, due to damage or deterioration over time, they release fibers. If the fibers are inhaled, they can lead to health problems, since as cancer and asbestosis.

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA) which requires schools to be inspected to identify any asbestos containing building materials. Suspected asbestos-containing building materials were located, sampled (or assumed) and rated according to condition and potential hazard. Every three years, **West Linn Wilsonville School District** has conducted a reinspection to determine whether the condition of the known or assumed asbestos containing building materials (ACBM) has changed and to make recommendations on managing or removing the ACBM. At the last reinspection, conducted in November of 1999, all materials listed in the Management Plan as asbestos containing (or assumed to be asbestos containing) were inspected and found to be in good condition.

The law further requires an asbestos management plan to be in place by July 1989. **West Linn Wilsonville School District** developed a plan, as required, which has been continually updated. The plan has several ongoing requirements: publish a notification on management plan availability and the status of asbestos activities; educate and train its employees about asbestos and how to deal with it; notify short-term or temporary workers on the locations of the asbestos containing building materials; post warning labels in routine maintenance areas where asbestos was previously identified or assumed; follow set plans and procedures designed to minimize the disturbance of asbestos containing building materials; and survey the condition of these materials every six months to assure that they remain in good condition.

The following buildings contain no asbestos-containing building materials; therefore, no operations and maintenance programs or future inspections are required: Boones Ferry Primary School, Boeckman Creek Primary School, Athey Creek Middle School, Wilsonville High School, Rosemont Ridge Middle School, West Linn High School, new North Wing Addition and the Wilsonville High School temporary modular buildings. For details concerning asbestos related activities such as, current asbestos removal, maintenance, or periodic surveillance in district facilities, please review our management plans located in each facilities administrative office.

It is the intention of **West Linn Wilsonville School District** to comply with all federal and state regulations regarding asbestos and to take whatever steps are necessary to ensure students and employees a healthy and safe environment in which to learn and work. You are welcome to review a copy of each facility asbestos management plan kept on file in our district administrative office or administrative office of each school during regular business hours. For all inquiries regarding the asbestos management plan and asbestos-related issues in our district please contact Tim Woodley, designated asbestos program manager, at (503) 673-7041.

West Linn-Wilsonville Schools is committed to providing safe schools for all students and employees in our district and we thank you for your attention to this important issue.

Sincerely,

DEPARTMENT OF OPERATIONS

Tim K. Woodley, Asbestos Program Manager
